

Power banks are extremely popular these days. They are perfect for when you are travelling and your phone suddenly runs out of power. By printing the Juice 8000mAh wireless powerbank with your logo and message, you're sure to generate extra publicity for your company! The most important thing about power banks is the strength of the battery. This one has 8000 mAh. A power bank with such a high mAh charge is currently still not needed for one charge of an average mobile phone. However, the charged power bank can sometimes even supply two mobile devices with power. Some notebooks also get enough power this way. This powerbank supports 5W wireless charging and also comes with micro-USB output to enable wired charging. A power indicator that shows the energy level at all times is also integrated. The micro-USB input and output offer 5 V/2 A. The wireless output has 5 W. The delivery includes a PVC-free charging cable made of TPE plastic and a standard gift box. The material used, ABS Plastic, Aluminium, makes the power bank particularly robust. Because it weighs 212.5 grams, you can count on a strong power bank! Thanks to the laser engraving technique, you can give this power bank a stylish print. The print is extremely durable thanks to the high wear-resistance of engraving. You can order quickly and easily by filling in all your preferences on our order page, send us your logo and you will receive a digital print proof.
