Length: 13.90 cm.
Width: 6.80 cm.
Height: 1.70 cm.

Power banks are extremely popular these days. They are perfect for when you are travelling and your phone suddenly runs out of power. You use the Powerbank Elite with wireless charger 8.000mAh 5W more often than you might think, for instance during holidays, while on the road or when spending a day at the beach. This power bank has a capacity of 8000 mAh. This means that a device with a battery of this size can be fully charged once. Powerbanks with such a large charging capacity manage to fully charge many mobile phones more than once and we get into charging areas where some notebooks are also supplied with a good amount of power. The powerbank has two USB-A ports and a Type-C port, making it compatible with a variety of charging cables. A powerbank charging cable included. Comes packaged in a gift box. The material used, abs, makes the power bank particularly robust. Weighing only 193 grams, you will hardly feel that you're carrying it around. With our many years of experience, our staff know better than anyone which power bank is the perfect match. So let us advise you on the best way to print power banks.
