

A5 notebook with a hard cover made from pineapple imitation leather. This material is made with 30% recycled pineapple components. This notebook has approx. 80 sheets/160 pages of white, lined FSC Mix certified paper (80 g/m²) and is equipped with an elastic closure, a bound spine, pen loop and reading ribbon. The vegan imitation leather is virtually indistinguishable from real leather. However, the material is made from pineapple leaves, a residual product from pineapple cultivation. For this reason, no additional substances are needed, such as water, fertilizer or pesticides for its production. The fibers of the pineapple leaves are washed, enriched with PU and dried in the oven. The result? Supple sheets of vegan imitation leather, which are then provided with a beautiful finish. After drying, a soft and attractive material with the properties of leather is created. It consists partly of fruit remains and partly of PU.
