

Power banks are extremely popular these days. They are perfect for when you are travelling and your phone suddenly runs out of power. You use the Solar Powerbank 8000+ Wireless Charger more often than you might think, for instance during holidays, while on the road or when spending a day at the beach. This power bank has a capacity of 8000 mAh. This means that a device with a battery of this size can be fully charged once. Would you like to provide your office with an emergency charger? Then a power bank of this strength is just the thing. Because not only mobile phones and tablets can be supplied with power, some notebooks can also be given the appropriate power. This powerbank can be charged with solar energy or mains power (via USB port). The input and output are 5 V/2 A. The delivery includes a micro-USB charging cable, LED indicators and user manual per item in one package. The material used, bamboo;synthetic material, makes the power bank particularly robust. Because it weighs 230 grams, you can count on a strong power bank! Haven't decided yet? No problem, you can always call us, send us an e-mail or contact us via chat. Please keep in mind that the colour may vary with laser engraving on natural products like bamboo
